

Vulnerable Populations Footprint Exercise

Maps & Data

1. From the [Vulnerable Populations Footprint](#) then select
2. Enter a location in the first window. For example, enter a state, county, zipcode, city name or address.

3. Zoom in by double-clicking the map, using the zoom bar on the left, or entering a specific location above the map legend.

5. In the Map Layers window add reference layers to better orient the map.

6. Click the shaded areas on the map to see additional information for that location.

4. Adjust the Vulnerability Thresholds to widen or narrow footprint parameters. Areas where both thresholds are exceeded will be highlighted in this color:  Those highlighted areas become the footprint.
