Community Health Improvement Plan (CHIP)

In 2011, the Shelby County Health Department spearheaded an effort to create a community health profile for Shelby County, TN to mobilize community partnerships, identify, prioritize, and plan to address key health issues within the community. With the help of its community partners, SCHD conducted a Community Health Assessment in 2012-13 using a community driven tool called Mobilizing Action through Planning and Partnerships (MAPP).

The intent of the assessment was to share its contents with the community and organizations. As a result of the assessment, SCHD also facilitated community efforts in 2014-15 to develop a Community Health Improvement Plan (CHIP) which is a compilation of goals, strategies, and action items that community partners adopted to advance health in Shelby County. The Community Health Improvement Plan (CHIP) helps us to focus on strategic health priorities, strategize collectively, coordinate actions of various partners, identify assets, and monitor our progress in community health improvement. The CHIP can be found on shelbycountytn.gov/index.aspx?NID=592

MAPP is

- A process or framework that involves community input and partnership
- A conduit/channel for health improvement and addressing strategic health priorities
- The hub for available grants and funding
- Allowing for community ownership/allowing the community and partners to be responsible for outcomes
- Dynamic - allows for change when assessments, data, and/or events call for evolution
- System focused
- Focused on partners of a think tank to develop objectives that lead to strategy
- Use of the health department’s Community Health Planners as facilitators and source for technical assistance

Strategic Health Priorities 2015 - 2018

- Health Disparities/
  Social Determinants of Health
- Healthy Lifestyles
- Increased Collaboration,
  Communication &
  Coordination within the Local
  Public Health System
- Mental Health
- Violence as a Public Health Issue

A Shelby County that provides and assures opportunities for every resident to develop and participate in activities and services that enhance their health, wellbeing, and quality of life
